The hidden messages in water

Author : Masaru Emoto

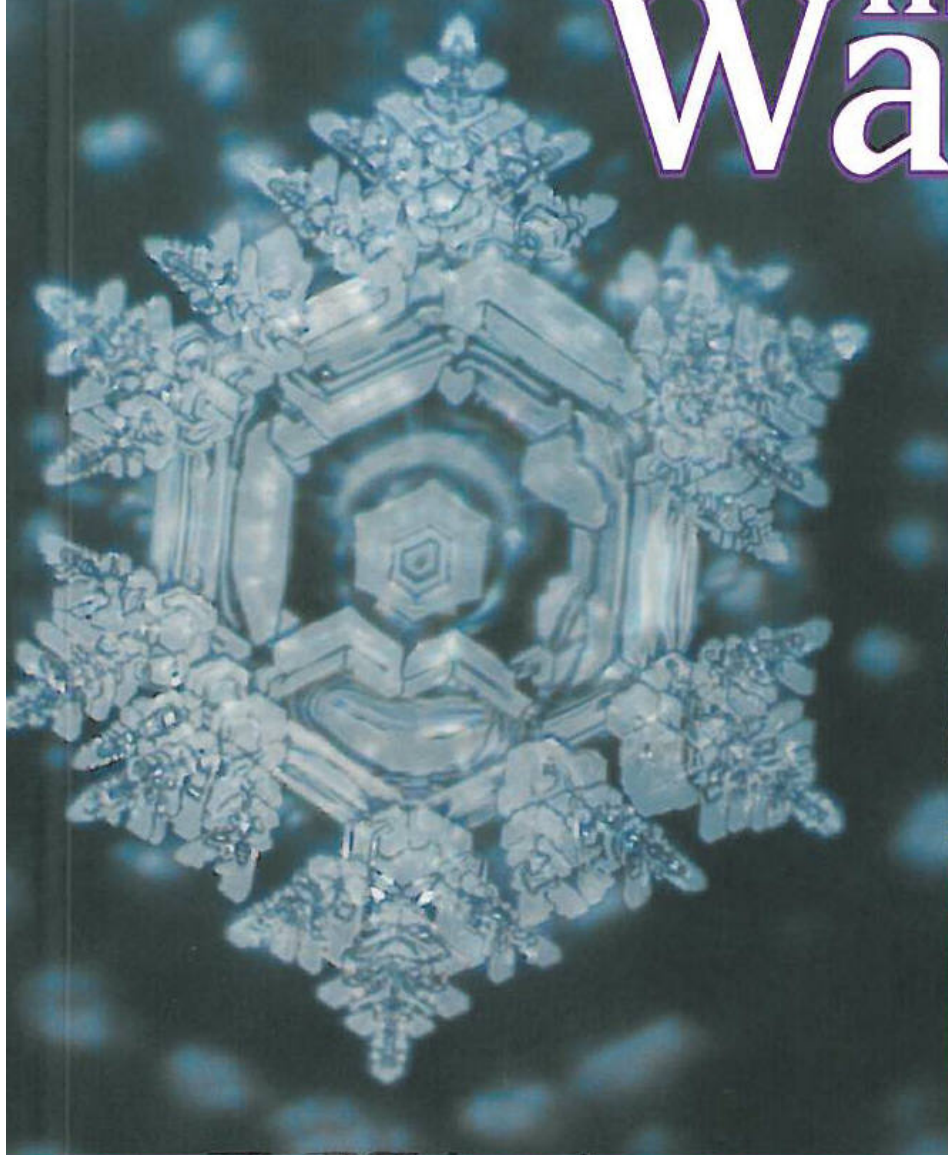

This book is about a man who is interested in nature . He wanted to know more about water. He has conducted experiments on many types of water from around the world. He discovered that the water pollution problem has increased. People often throw rubbish into the sea. They make the water very dirty. The man thinks that water is very important because we need water every day. We use water to drink, cook food, wash dishes and take baths. In this book, there are a lot of photos about water such as water from clear springs. Water exposes us to a colorful world.

After reading this book, I realised that water is very important in our lives. I started to have much more respect for water and look at water in a special way. In this book, I learnt a lot of new English words and some information about water. The photos of water are so beautiful and real. There is one photo of water which looks like a dolphin. Water can be very beautiful in photographs. If the temperature is under 0°C, water will change to ice. But water pollution is a big problem for our earth. I think people should not waste water. Water is a creation of a positive future for our world and should be treated like a treasure. We can find a lot of secrets and beautiful living things in the water.
