

Call No. : F SHE

Planet Janet in orbit

Author : Dyan Sheldon

What have you done in your summer holiday? Getting a job? Studying your schoolwork or doing your summer holiday homework? Which is more important for you? Here I will introduce this book for you. It can tell you what you can do in the summer holiday. This book's main character Janet has had a great summer holiday. How about you?

This book is called *Planet Janet in orbit*. And the author is Dyan Sheldon. This book is one of the series of 'Planet Janet'. It is like a diary. Janet writes her diary entries every day, and this book shows her diary. We can know what she did from it. When every exam is over, summer is going to begin. In the summer, Janet goes to have a job in the restaurant and find that being a waiter is not an easy job. But she still works in the restaurant. Also, her friend and her mother fell in love. It sounds like she is sick.

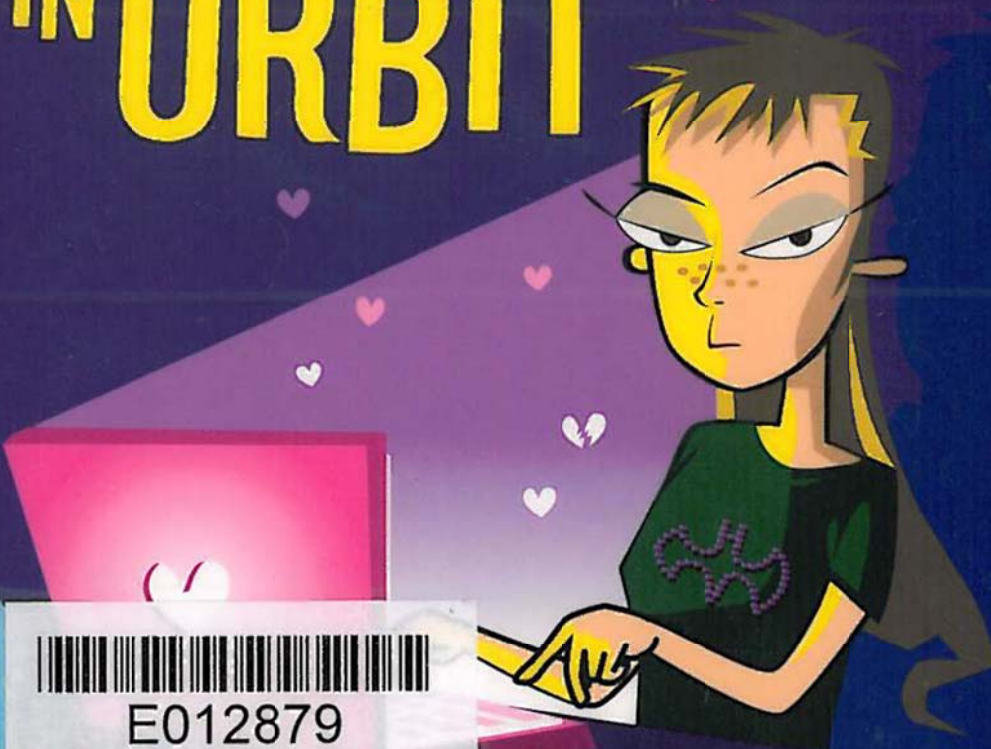

However, Janet has fallen in love too. In this book, we can know that Janet has come across many fun things of doing her job and studying in her school. I think this book is very interesting. It uses a special text type---diary, to tell us what the story of Janet is about. It is a good and new way for attracting the readers. Also, love is an amazing topic for teenagers. If you want to read this book, you can borrow it from our school library.
